

*Live*Graph

framework for real-time data visualisation, analysis and logging

<http://www.live-graph.org>

- Update graphs in real-time while simulation is running.
- Simple user interface to manage several 100s data series at the same time.
- Transform data to common state by a single click.
- Runs anywhere (Java).
Integrates with anything (not only Java).
- Simple CSV-style files.
Data logging library (only Java).
- Free, open-source, well documented, actively developed.
